Subject: Notes in the record about Tetra Tech EC I concerns from DTSC
Attachments: Draft_HPNS_10_5_17BCT_Meeting_Summary_.docx

Ms. Bacey (DTSC) noted that DTSC has concerns about finalizing radiological documents for sites where the Navy may need to go back and take additional samples to confirm the initial results. The Navy noted that they are reviewing reports on a site by site basis and they can't put all the documents for specific sites on hold until the re-testing is complete because the period of performance for the contractor working on the contract will expire and there will be nobody to move the document forward to final. The agencies will likely include language in their letter noting the fact that additional sampling may be warranted before approval of the final report can be given.

I know I read them before, but I can't find them now. Could you please resend this? I would appreciate it!
